Share files between two connected computers with this link cable!

The Eminent EM1012 USB High Performance Link Cable allows you to connect two computers to exchange files or data. The fact that the link cable is fully compliant with USB 2.0 (480Mbps!) specifications makes this device extremely suited for large files.

In order to use the Eminent Link Cable no drivers or software need to be installed. You can deploy the Link Cable at any moment! The advanced network-sharing function (Windows XP only) allows you to quickly hook up a second computer over USB to an existing network on another pc.
